'Web Development, Graphic Design'

Goal: To obtain a position that will utilize my training in web development and continue to further expand my coding abilities.

PROJECTS

Responsive Portfolio — *Web application*

- Web application highlighting projects, about and contact information.

- *GitHub / Responsive Portfolio*

Fitness Tracker — *Web application*

- Application utilizing languages including **Javascript**, **jQuery**, **HTML**, **CSS** and **API's** including **Materialize**, **Google Charts** and **Open Weather**.

- Used graphic design skills to create compiled images and graphics

- Interactive web application designed for fitness enthusiasts

- *GitHub / Fitness Tracker*

Eat-Da-Burger! — *Web application*

- Developed using MVC, **Javascript**, **jQuery**, my**SQL, Handlebars, CSS, deployed to Heroku**

- Fun application that allows the user to create, devour, eat again, and delete burgers.

- *GitHub / Heroku / Eat-Da-Burger!*

Code Quiz — *Web application*

- Application designed using **Javascript**, **jQuery**, **HTML** and **CSS**

- Highlights functionality over aesthetics

- Designed for coding beginners seeking to test their knowledge

- *GitHub / Code Quiz*

Employee Tracker — *Node application*

- Developed using **Javascript**, **Node** and **SQL**

- Application controlled via **Node** and designed for employers to view, add, update, and remove employees, managers, departments and roles stored in a **MySQL** database

- *GitHub / Demo Video*

SKILLS

Front end development

Web design

Graphic design

Back end development

LANGUAGES

Javascript

HTML

CSS

SQL

NODE

- ## UNC Charlotte Coding Bootcamp, Charlotte, NC

March 2020 – October 2020

Front End: HTML / CSS / JAVASCRIPT

<u>HTML</u>:
With HTML rendering the content of a web page, I've learned how to build the content of a web page in HTML. In coding HTML I have also learned how to implement libraries such as **Bootstrap** in order to build an organized layout.
<u>CSS</u>:
With CSS controlling the way a web page looks, I am able to style my page **aesthetics** according to what is required and/or my personal preference.
 In doing so I have used my skills in **graphic design**, color scheming and creativity to make the **DOM** look professional and polished.
This includes using custom backgrounds, buttons, links, navbars, dropdown menus, and incorporating personally designed graphics.
<u>JAVASCRIPT</u>:
With Javascript governing the **behavior** of a web page, I have learned the following and more:
- ES5 and ES6 syntax
- Using functions to control all behaviors
- On click events
- Event delegation
- Storing information in variables
- Assignments
- Attributes
- Data types
- Arrays, array methods
- Scoping
- Making ajax and axios requests
- Constructing objects
- JSON
- Using template literals

Back End: MVC, API's, Servers, Databases, Node
- Using Javascript to pass data/requests to a **controller->model->orm->database** and once data is returned, render to the front end
- Creating databases using **mySQL**, **Sequelize, Mongo, Mongoose** and **Robot**
- Using **Sequelize** and **Mongoose** to obtain and modify information in a database
- Design applications operated by and within **Node**

Motion Church, Seattle, WA — *Production Leader*
March 2017 – July 2019
- Implemented graphic design skills useful to program development. **Graphics designed may be used in styling web pages**
- Utilized Graphic Design skills to create graphics used in live settings using software such as Pixelmator and ProPresenter. **Programs such as ProPresenter are a more professional option to create online, office and arena presentations**

- Managed and trained teams of staff, volunteers and interns to operate and orchestrate graphics, lights and sound in real time

- Large church with multiple campuses and consisting of over 7,000 members in house and online

EMPLOYMENT EXPERIENCE

TriWest, Seattle, WA — *Care Authorization Specialist*

December 2018 - June 2020

- Authorized medical care for veterans through the Veteran's Choice Program
- Communicated with management, providers, veterans, and coworkers to appoint veteran's to the appropriate providers within a limited timeframe

Best Buy, Tacoma, WA — *Magnolia Sales Representative*

October 2017 - January 2019

- Customized home theater solutions to best fit customer's needs and budgetary requirements

Tier One Relocation, Mountlake Terrace, WA — *Dispatcher*

April 2017 - October 2017

- Dispatched transport for military household goods relocation
- Worked directly with military members, carriers, and vendors to provide optimal service within required date parameters
-

EDUCATION

University of North Carolina Charlotte, Charlotte, NC

March 2020 - October 2020

Certificate: Coding Bootcamp – Full Stack Web Development Program

Columbia College Chicago, Chicago, IL — *BA*

August 2001 - December 2006

Bachelor of Arts: Audio Engineering
